3 Days Workshop on Koha (Open Source Integrated Library System) From 26th November to 28th November 2015

About Koha Software

Koha is an open source Integrated Library System (ILS), used world - wide by public, school & special libraries. Koha is web-based ILS, with a SQL database (MySQL preferred) backend with cataloguing data stored in MARC. The user interface is very configurable & adaptable & has been translated into many languages. Koha has most of the features that would be expected in an ILS, including:

- A) Union Catalog Facility
- B) Customizable search
- C) Circulation & Borrower management
- D) Full acquisition system including budgets & pricing information
- E) Simple acquisitions system for the smaller library
- F) Ability to cope with any number of branches, patrons, patron categories, item categories, items, currencies & Other data.
- G) Serials system for magazines or newspapers
- H) Reporting
- I) Reading lists for members
