REPORT ON SCILAB & LATEX WORKSHOP
(Held on: 19th to 24th June 2017)

DATE: 27/06/2017

□ **Venue: Computer Centre**

□ **Time:** 10am-4pm

This one week Software training course on Scilab, Latex and R is very useful for academic and research community. Selected Participants get a hands on experience to understand and work with these software after the workshop. Scilab is a free and open source software for numerical computation providing a powerful computing environment for engineering and scientific applications. It is a high level programming language allowing access to advanced data structures, 2D and 3D graphical functions. The software can be used for signal processing, statistical analysis, image enhancement, fluid dynamics simulations.

LaTex is a document markup language and preparation system for Tex typesetting. It is an essential tool for academic and research community to prepare research papers for publications in scientific journals, paper presentation in conferences as well as project documentation. It is a value addition to academic skill set.R is a language and environment for statistical computing and graphics. R provide wide variety of statistical (linear and nonlinear modeling, classical statistical tests, time-series analysis, classification, clustering,) and graphical techniques, and is highly extensible.

Workshop was end by 4.00 pm concluded by Mr.Gajanan Khapre Workshop Coordinator by vote of thanks.
